

Protecting and improving the nation's health

Public Health Outcomes Framework

Indicators at a glance (February 2017)

Notes:

- Value cells are shaded red, amber or green to show significance compared to England, or where the value can be benchmarked against a goal.

- In the change columns, prev refers to the change in value compared to the previous data point; recent trend refers to the analysis done in the Fingertips tool which tests for a statistical trend. This is currently only available for certain indicator types, full details are available in the tool.

- Increases or decreases are only shown if they are statistically significant. An upwards arrow (\uparrow , \uparrow or \uparrow) represents a significant increase in the indicator value, a downwards arrow (\downarrow , \downarrow or \downarrow) represents a significant decrease. A sidewards arrow (\leftrightarrow) is displayed if there has been no significant change.

- Statistically significant changes highlighted in the change from prev column have been calculated by comparing the confidence intervals for the respective time points. If the confidence intervals do not overlap, the change has been flagged as significant. Changes in the recent trend column are calculated using a chi-squared statistical test for trend.

- Where no arrow is shown, no comparison has been made. This may be due to the fact that the required data to make the comparison is not available for the time point, or that no

confidence interval values are available for the indicator. Certain indicator types have not yet been included in the recent trend analysis.

- The arrows are coloured green and red for those indicators where a change can be described as improving or worsening respectively.

- Indicators where data has been updated or revised in the latest update have been shaded in the tables.

- Indicators where the value is marked with * have a data note attached to them. See www.phoutcomes.info for full details

Summary for Camden

Domain: Overarching indicators					
Indicator	Period	Value	Unit	Change from prev	Recent trend
0.1i - Healthy life expectancy at birth (Male)	2013 - 15	63.7	Years	\Leftrightarrow	
0.1i - Healthy life expectancy at birth (Female)	2013 - 15	65.1	Years	\leftrightarrow	
0.1ii - Life Expectancy at birth (Male)	2013 - 15	81.7	Years	\leftrightarrow	
0.1ii - Life Expectancy at birth (Female)	2013 - 15		Years	\leftrightarrow	
0.1ii - Life Expectancy at 65 (Male)	2013 - 15	20.3	Years	\leftrightarrow	
0.1ii - Life Expectancy at 65 (Female)	2013 - 15	23.9	Years	\leftrightarrow	
0.2i - Slope index of inequality in life expectancy at birth based on national deprivation deciles within England (Male)	2012 - 14	-	Years		
0.2i - Slope index of inequality in life expectancy at birth based on national deprivation deciles within England (Female)	2012 - 14	-	Years		
0.2ii - Number of upper tier local authorities for which the local slope index of inequality in life expectancy (as defined in 0.2iii) has decreased (Male)	2012 - 14	-	Count		
0.2ii - Number of upper tier local authorities for which the local slope index of inequality in life expectancy (as defined in 0.2iii) has decreased (Female)	2012 - 14	-	Count		
0.2iii - Slope index of inequality in life expectancy at birth within English local authorities, based on local deprivation deciles within each area (Male)	2012 - 14	10.0	Years	\leftrightarrow	
0.2iii - Slope index of inequality in life expectancy at birth within English local authorities, based on local deprivation deciles within each area (Female)	2012 - 14	7.7	Years	÷	
0.2iv - Gap in life expectancy at birth between each local authority and England as a whole (Male)	2013 - 15	2.2	Years	\Leftrightarrow	
0.2iv - Gap in life expectancy at birth between each local authority and England as a whole (Female)	2013 - 15	3.0	Years	\Leftrightarrow	
0.2v - Slope index of inequality in healthy life expectancy at birth based on national deprivation deciles within England (Male)	2012 - 14	-	Years		
0.2v - Slope index of inequality in healthy life expectancy at birth based on national deprivation deciles within England (Female)	2012 - 14	-	Years		
0.2vi - SII in healthy life expectancy based within local authorities, based on deprivation within Middle Super Output Areas (Male)	2009 - 13	17.6	Years		
0.2vi - SII in healthy life expectancy based within local authorities, based on deprivation within Middle Super Output Areas (Female)	2009 - 13	19.3	Years		
0.2vii - Slope index of inequality in life expectancy at birth within English regions, based on regional deprivation deciles within each area (Male)	2012 - 14	-	Years		
0.2vii - Slope index of inequality in life expectancy at birth within English regions, based on regional deprivation deciles within each area (Female)	2012 - 14	-	Years		

Domain: Wider determinants of health					
Indicator	Period	Value	Unit	Change from prev	Recent trend
